VÄINÖ KASURINEN

SOFTWARE DEVELOPER

KEY FACTS

- 5+ years experience
- 10+ developed Apps
- Wrote bachelor's thesis about mobile user interfaces and usability
- Wrote and built master's thesis about AI assistant for maintenance

SKILLS

Development
Kotlin, Android, Java, Javascript, Python, React, Unit-Testing, Azure, Docker, Spring boot, Git, LLM integration, RAG, Linux

Project Management
Agile methodology, Scrum, Prototyping, Architectural Planning, Teamworking, Problem solving

PROFILE

Software developer with a Master's degree from the University of Oulu and hands-on experience at Nokia in base station software specification. Most comfortable with Kotlin, Java and Python. I have built a solid foundation in both technical skills and collaborative teamwork. I thrive under pressure, adapt quickly to new challenges, and bring a calm, focused approach to problem-solving. Seeking a software engineering role with real ownership of the systems I build.

WORK EXPERIENCE

Nokia, Oulu 2.5.2025 - 30.9.2026

Entity specification engineer trainee / Thesis worker

- Modeled software architectures and system components using MagicDraw with UML methodologies.
- Utilized JIRA for task management and tracking within an agile development environment.
- Developed an AI-based maintenance assistant for base stations as part of my Master's thesis, incorporating retrieval-augmented generation (RAG).

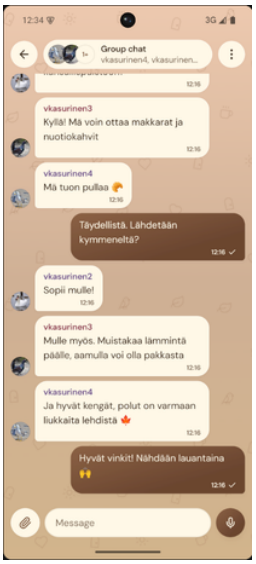

Sakupe Oy, Siilinjärvi 2019 - 2024

Summer worker

My work included:

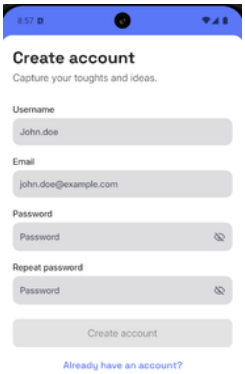

- Making orders for clients
- Wash different textiles

TOP PROJECTS

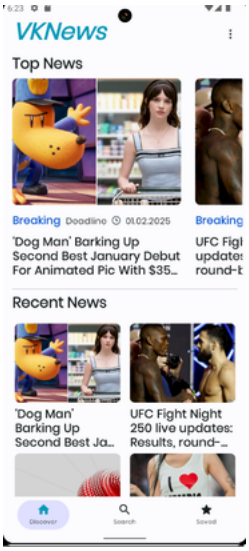

Knock

- Made with Kotlin Multiplatform, Compose Multiplatform, Ktor, Room and Koin
- Runs on Android, iOS, Windows, macOS and Linux from one shared codebase
- Real-time chat with WebSockets, image and voice messages, push notifications and offline support
- Own backend with Spring Boot, PostgreSQL, Redis, Nginx and RabbitMQ
- Used MVVM and Clean architecture guidelines
- Time used: 100h+
- Link to Github: github.com/VKasurinen/Knock

NoteMark

- Made with Kotlin, Jetpack compose, Ktor, Room, Koin and Coil
- Secure user authentication (Register/Login)
- Create, edit, and delete notes
- User settings management
- Online/offline synchronization
- Used MVVM and Clean architecture guidelines
- Own backend with Spring Boot, PostgreSQL and Redis
- Time used: 100h+
- Link to Github: github.com/VKasurinen/NoteMark

News application

- Made with Kotlin, Jetpack compose, Retrofit, Room, Koin and Coil
- Used MVVM and Clean architecture guidelines
- Time used: ~20h
- Link to Github: github.com/VKasurinen/VKNews
